gutter  clean™
SYSTEM

UPKEEP-FREE EAVESTROUGH PROTECTION
FOR EXISTING EAVESTROUGHs

**Eliminates the aggravation
of cleaning out your eavestroughs**

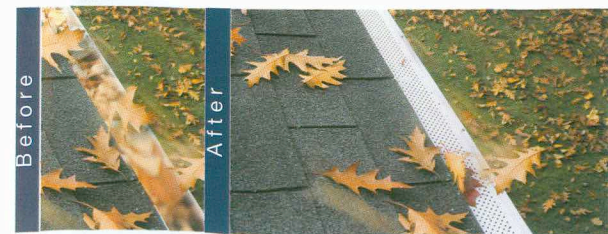

PATENTED AND MANUFACTURED
IN CANADA BY

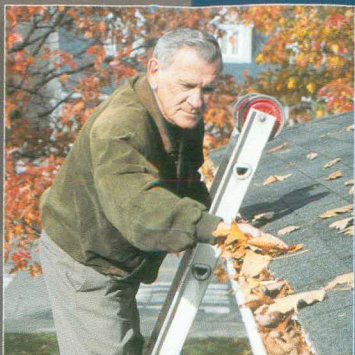

alu-rex

WORKS THE FIRST TIME... ALL THE TIME!

Imprimé au Canada/Printed in Canada

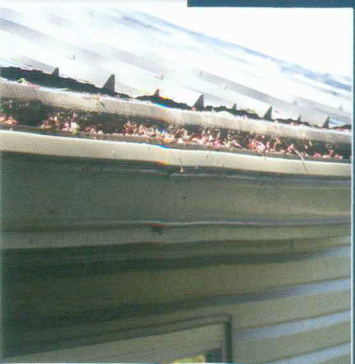

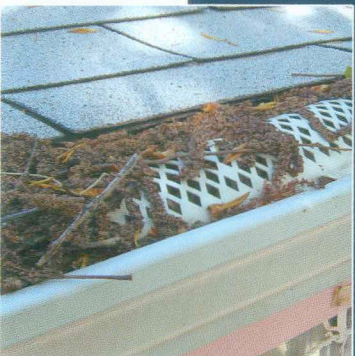

Do you have to
perform regular
maintenance
on your
eavestroughs?

Do you worry
about the dangers
of climbing a
ladder to clear
out your
eavestroughs?

Have you tried
other products that
turned out to be
ineffective?

The Gutter Clean System™, finally an effective and affordable eavestrough protection system that:

» **Protects your existing eavestroughs from leaves** and debris, thereby eliminating the need for periodic eavestrough upkeep. An ultra-durable PVC strip also seals the back of your eavestrough to keep out debris. A light breeze under 15 km/h is all it takes to sweep debris from the surface.

» **Keeps debris from clogging your existing eavestroughs.** The Gutter Clean System can drain three times more water (29.7 in./h, or 754 mm/h) than the highest precipitation ever recorded (12.3 in. or 312 mm in 1 hour). Note: Only 1 to 2 in. (25 mm to 50 mm) of rain falls in an average rainstorm.

» **Protects existing eavestroughs from the snow and ice** that can accumulate in and damage your eavestroughs. They keep working all winter, and look great a whole lot longer.

» **Eliminates the dangers** of climbing a ladder to repair or maintain your existing eavestroughs, keeping you safe.

*For everything you own, you deserve the best quality.
The Alu-Rex eavestrough protection system — the only effective and affordable solution that leaves
your existing eavestroughs upkeep free!*
